Amendments to Claims

1. (Currently Amended) A method of providing desulfurized hydrocarbon feed, comprising:

producing hydrogen-rich reformate from <u>undesulfurized</u> hydrocarbon feed in a small hydrogen generator; and

feeding said hydrogen-rich reformate along with the <u>undesulfurized</u> hydrocarbon feed to a hydrogen desulfurizer.

2. (Currently Amended) A method according to claim 1 wherein said producing step comprises:

producing hydrogen-rich reformate from the <u>undesulfurized</u> hydrocarbon feed and humidified air.

3. (Currently Amended) Apparatus for providing desulfurized hydrocarbon feed, comprising:

means including a small hydrogen generator for producing hydrogen-rich reformate from <u>undesulfurized</u> hydrocarbon feed;

a hydrogen desulfurizer; and

5

5

5

means for feeding said hydrogen-rich reformate along with the <u>undesulfurized</u> hydrocarbon feed to said hydrogen desulfurizer.

- 4. (Currently Amended) A system for desulfurizing hydrocarbon feeds, comprising:
 - a source of undesulfurized hydrocarbon feed;
- a small hydrogen generator receiving said <u>undesulfurized</u> hydrocarbon feed from said source and providing hydrogen-containing reformate gas; and

a hydrogen desulfurizer receiving said <u>undesulfurized</u> hydrocarbon feed from said source of <u>undesulfurized</u> hydrocarbon feed and receiving said hydrogen-containing gas from said small hydrogen generator.

5. (Currently Amended) A system according to claim 4 further comprising:

a source of humidified air; and wherein
said small hydrogen generator receives humidified air from the
corresponding said source of humidified air to produce said reformate gas from said
fuel undesulfurized hydrogen feed and said humidified air.

- 6. (Original) A system according to claim 4 wherein: said small hydrogen generator is a mini-CPO (catalytic partial oxidizer).
- 7. (**Original**) A system according to claim 4 wherein: said small hydrogen generator is a mini-POX (non-catalytic partial oxidizer).
- 8. (Original) A system according to claim 4 wherein: said small hydrogen generator is a mini-ATR (auto-thermal reformer).
- 9. (Currently Amended) A system for producing hydrogen-rich reformate from hydrocarbon feeds, comprising:
 - a source of undesulfurized hydrocarbon feed;
 - a source of humidified air;
 - a source of water;

5

5

a small hydrogen generator receiving <u>undesulfurized</u> hydrocarbon feed from said source <u>of undesulfurized hydrocarbon feed</u> to produce <u>a first stream of</u> hydrogen-containing reformate gas;

a hydrogen desulfurizer receiving <u>undesulfurized</u> hydrocarbon feed from said source of <u>undesulfurized</u> hydrocarbon feed and <u>said first stream of</u> hydrogen-containing reformate gas from said small hydrogen generator, and providing desulfurized hydrocarbon feed; and

a fuel processor including a major reformer receiving said desulfurized hydrocarbon feed and said humidified air and producing a second stream of hydrogen-containing reformate, a water-gas shift reactor receiving said second stream of hydrogen-containing reformate and said water and feeding the resultant gas into a preferential CO oxidizer, for producing a third stream of hydrogen-containing reformate for use as fuel, whereby recycled hydrogen gas from the output of said fuel processor in said third stream is not required for said desulfurizer, thereby (a) eliminating the need for an expensive, power consuming hydrogen blower and (b) reducing the steam fed into said hydrogen desulfurizer.

10. (Currently Amended) A system according to claim 9 further comprising:

a source of humidified air; and wherein:

10

15

20

said small hydrogen generator receives <u>said</u> humidified air from the corresponding source to produce said <u>first stream of</u> reformate gas from said fuel <u>undesulfurized hydrocarbon feed</u> and said air.

- 11. (Original) A system according to claim 10 wherein: said small hydrogen generator is a mini-CPO (catalytic partial oxidizer).
- 12. (Original) A system according to claim 10 wherein: said small hydrogen generator is a mini-POX (non-catalytic partial oxidizer).
- 13. (Original) A system according to claim 9 wherein: said small hydrogen generator is a mini-ATR (auto-thermal reformer).
